## Subject Index

Abscesses, *B. fragilis*-infected and sterile sc, antibiotic levels in mice, 487
*Acanthamoeba castellanii*, a case of keratitis in New York, New York, and features of 10 cases, 662
Acids, free fatty, effect on protein binding of antimicrobial agents, 609
Acyclovir, sensitivity of resistant mutants of herpes simplex virus to other antiviral drugs, 281
Adenovirus
  acute rhabdomyolysis associated with infection, 133
  type 4, nosocomial conjunctivitis, 28
Adhesins, receptor interactions mediating attachment of bacteria to mucosal surfaces, 325
Adhesion sites, impaired redistribution related to abnormal neutrophil motility in glycogenosis type Ib, 447
Adenine arabinoside, changes in hepatitis B virus markers in chronic infection by combined treatment with interferon, 772
Amikacin, pharmacokinetics and efficacy when administered into cerebral ventricles of neonates as therapy for gram-negative meningitis, 141
Aminoglycosides
  conflicting views on intraventricular use in treatment of gram-negative meningitis, 293
  pharmacokinetics and efficacy of amikacin administered into cerebral ventricles of neonates as therapy for gram-negative meningitis, 141
Amoebae, report of two cases and antibiotic and immunologic studies of primary meningoencephalitis, 193
Ampicillin
  frequency of resistant *H. parainfluenzae* in children, 495
  single-dose therapy for severe shigellosis in Bangladesh, 164
Antibiotics
  bactericidal activity against *C. fetus* subspecies *intestinalis*, 500
  correlations between methods for measurement of synergy, 757
  levels in *B. fragilis*-infected and sterile sc abscesses in mice, 487
  treatment of two cases of primary amoebic meningoencephalitis, 193
Antibodies
  destruction of newborn *T. spiralis* larvae, 712
  monoclonal, 346
  salivary IgA, to mumps virus during and after mumps, 617
Antibody
  bacteria-specific, in urine of patients with acute pyelonephritis and cystitis, 404
  cytolytic IgM, to cytomegalovirus in primary infection in humans, 821
  IgM, to hepatitis B core antigen, diagnostic parameter of acute infection with hepatitis B virus, 803
  response to
    capsular polysaccharides of groups A and C *N. meningitidis* and *H. influenzae* type b during bacteremic disease, 32
    live and killed poliovirus vaccines in milk of Pakistani and Swedish women, 707
    pneumococcal vaccine in patients with multiple myeloma, 590
  to *Giardia*, protection against infection with *G. muris* by immune milk, 242
Antimicrobial agents
  depression of colony formation by human T lymphocytes, 832
  effect of free fatty acids on protein binding, 609
  multiple, evolution of a plasmid mediating resistance during a prolonged epidemic of nosocomial infections, 170
Antimicrobial modulation, infection prevention in patients with decreased host defense mechanisms by selective elimination of potentially pathogenic bacteria, 644
Antithymocyte globulin, association with impaired lymphocyte transformation response to cytomegalovirus and phytohemagglutinin in renal transplant recipients, 259
Appendectomy, subsequent bacteremia due to *B. fragilis*, 635
Arabinitol, serum levels in detection of invasive candidiasis in animals and humans, 677
Argentine hemorrhagic fever, coagulation studies, 1
Armed Forces Epidemiological Board and atypical pneumonia, 305
*Ascaris suum*, involvement of sugars and $Mg^{++}$ in attachment of phagocytic cells to juveniles, 71
*Aspergillus fumigatus*, immunologic studies of disseminated infection in nude mice, 726
Autarcesis against measles in early infancy, 752
Bacille Calmette-Guérin
  influence of
    vaccination-challenge interval on protective efficacy of vaccine against low-virulence *M. tuberculosis* in guinea pigs, 739
    virulence of *M. tuberculosis* on vaccine protection in guinea pigs, 734
Bacteremia
  *B. fragilis*, after elective appendectomy in renal transplant recipients, 635
  *Salmonella*, reports to the Centers for Disease Control, 1968–1979, 743
Bacteria
  adhesin-receptor interactions mediating attachment to mucosal surfaces, 325
  enteric pathogenic, among American Peace Corps volunteers in rural Thailand, 767
  potentially pathogenic, infection prevention in patients with decreased host defense mechanisms by selective antimicrobial modulation, 644
Bacteriuria, comparison of efficacy of nalidixic acid and cephalexin and effect on fecal and periurethral carriage of Enterobacteriaceae, 603
*Bacteroides fragilis*
  antibiotic levels in infected and sterile sc abscesses in mice, 487
  bacteremia after elective appendectomy in renal transplant recipients, 635
*Bordetella*, alterations in envelope proteins as phase-shift markers, 562
*E*-5-(2-bromovinyl)-2′-deoxyuridine, vs. interferon in systemic

treatment of infection with herpes simplex virus in athymic nude mice, 846
*Campylobacter fetus* subspecies
*intestinalis*, bactericidal activity of antibiotics, 500
*jejuni*, the hamster as a reservoir, 856
Cancer, relapsing pseudomembranous colitis associated with chemotherapy, 865
*Candida*
hematogenous endophthalmitis in patients receiving parenteral hyperalimentation fluids, 655
serum levels of arabinitol in detection of invasive infection in animals and humans, 677
*Candida albicans*, adherence to human vaginal and buccal epithelial cells, 76
Capsule
gonococcal, electron microscopy, 796
stages and role in attachment of *E. coli* strain RDEC-1 to intestinal epithelial cells in diarrheal rabbits, 219
Cefoperazone, pharmacokinetics and bacteriologic efficacy in experimental bacterial meningitis, 156
Cefotaxime, pharmacokinetics and bacteriologic efficacy in experimental bacterial meningitis, 156
Central nervous system, toxicity of intraventricularly administered gentamicin in adult rabbits, 148
Cephalexin, efficacy in bacteriuric women and effect on fecal and periurethral carriage of Enterobacteriaceae, 603
Cerebrospinal fluid, reported isolates of *Salmonella* in the United States, 1968–1979, 504
Chagas' disease, fractionation of immune RNA isolated from spleens of mice, 827
Chemotactic factors, stimulation of hexose uptake by human eosinophils, 719
Chemotherapy, cancer, associated relapsing pseudomembranous colitis, 865
Children
frequency of ampicillin-resistant *H. parainfluenzae*, 495
infections with *L. pneumophila*, 386
virulence in mice of epidemic isolates of *S. typhimurium*, 465
*Chlamydia trachomatis*
extraocular infections in children in areas with endemic trachomatis, 853
new animal model for study of genital infections with the agent of mouse pneumonitis, 63
pneumonia in immunocompromised (nude) mice, 238
Cholera, duration of infection-derived immunity, 818
*Clostridium botulinum*, type G, isolation and identification of toxin in five sudden unexpected deaths, 22
*Clostridium difficile*
interference with normal fecal flora, 470
isolation from environments and contacts of patients with antibiotic-associated colitis, 42
studies on the epidemiology of antibiotic-associated colitis in hamsters, 51
Colitis
antibiotic-associated
due to *C. difficile*, studies on epidemiology in hamsters, 51
isolation of *C. difficile* from the environment and contacts of patients, 42
relapsing pseudomembranous, associated with cancer chemotherapy, 865
Conjunctivitis, nosocomial, caused by adenovirus type 4, 28
Countercurrent immunoelectrophoresis, rapid diagnosis of varicella-zoster virus infections, 274
*Cryptococcus neoformans*, familial meningitis, 133
Cystitis, bacteria-specific antibody in urine of patients, 404
Cytomegalovirus
association of impaired lymphocyte transformation response with antithymocyte globulin in renal transplant recipients, 259
cytolytic IgM antibody in primary infection in humans, 821
lymphocytes in infections, 857
modification of murine infection by adoptive humoral immunity, 231
pathogenicity, immunology, and vaccine initiatives, 618
prevalence of infection in homosexual men, 188
specific cellular and humoral immune responses
after immunization with live Towne strain vaccine, 585
in human pregnancy, 391
Diagnosis
evaluation of commercially available test kits for rubella, 578
rapid
of varicella-zoster virus infections by countercurrent immunoelectrophoresis, 274
radioimmunoassay using $^{125}$I-labeled staphylococcal protein A for antibody to varicella-zoster virus, 693
serologic, of enterovirus type 71 infections using selected plaque mutants, 122
serum levels of arabinitol in detection of invasive candidiasis in animals and humans, 677
soluble skin test antigen of varicella-zoster virus prepared from fluid of infected cultures, 684
Diarrhea
due to *E. coli* strain RDEC-1 in rabbits
stages and role of capsule in attachment to intestinal epithelial cells, 219
the Peyer's patch as the initial site of attachment and colonization, 440
travelers'
among American Peace Corps volunteers in rural Thailand, 767
biweekly prophylactic doxycycline, 598
Dimethylglycine, immunomodulating properties in humans, 101
DNA
loss of plasmid coding for β-lactamase during experimental infection with *H. influenzae* type b, 548
recombinant technology in interferon cloning, report of a workshop, 297
Doxycycline, biweekly prophylactic, for travelers' diarrhea, 598
Drugs, antiviral, sensitivity of acyclovir-resistant mutants of herpes simplex virus, 281
Ebola virus
clue to ecology, 749
inactivation with $^{60}$Co irradiation, 291
Endophthalmitis, hematogenous candida, in patients receiving

parenteral hyperalimentation fluids, 655
Endorphins, pathophysiologic role in experimental shock, 863
Endothelium, virus infection, 266
*Entamoeba histolytica*, interaction with human polymorphonuclear neutrophils, 83
Enterobacteriaceae
consistency of adherence irrespective of site of isolation, 855
effect of nalidixic acid and cephalexin on fecal and periurethral carriage in bacteriuric women, 603
Enterovirus type 71, serologic diagnosis of infections using selected plaque mutants, 122
Envelope proteins, alterations as phase-shift markers in *Bordetella*, 562
Eosinophils, stimulation of hexose uptake with chemotactic factors, 719
Epidemiology
antibiotic-associated colitis due to *C. difficile* in hamsters, 51
evolution of a plasmid mediating resistance to multiple antimicrobial agents during a prolonged epidemic of nosocomial infections, 170
family illness associated with shigella infection, 130
isolation of *C. difficile* from the environment and contacts of patients with antibiotic-associated colitis, 42
naturally acquired infection with *V. cholerae* serogroup O1 in the United States, 182
nosocomial conjunctivitis caused by adenovirus type 4, 28
prevalence of cytomegalovirus infection in homosexual men, 188
reported isolates of *Salmonella* from cerebrospinal fluid in the United States, 1968–1979, 504
reports of salmonella bacteremia to the Centers for Disease Control, 1968–1979, 743
two outbreaks of sternal wound infections due to organisms of the *M. fortuitum* complex, 533
Epstein-Barr virus
infections during pregnancy, 499
lymphocytes in infections, 857
*Escherichia coli*
invasive, role of plasmids in adherence to mammalian cells, 286
K1, pharmacokinetics and bacteriologic efficacy of moxalactam, cefotaxime, cefoperazone, and rocephin in experimental meningitis, 156
mecillinam-resistant, dissociation of growth inhibition and morphologic change, 114
strain RDEC-1
stages and role of capsule in attachment to intestinal epithelial cells in diarrheal rabbits, 219
the Peyer's patch as the initial site of attachment and colonization in diarrheal rabbits, 440
Esterase, dependence of lysozyme secretion, spontaneous migration, and continuity of the respiratory burst in human neutrophils, 94
Exercise, diminution of thymus size in mice during forced swimming, 292
Exotoxin, *S. aureus* associated with toxic-shock syndrome, identification and characterization, 509
Fallopian tubes
human
observations on damage by *N. gonorrhoeae* colony type 1 or type 4 in organ culture, 413
studies of toxicity of *N. gonorrhoeae* for mucosa, 423
toxic activity of purified lipopolysaccharide of *N. gonorrhoeae* for mucosa, 432
Fecal flora, interference with *C. difficile*, 470
Fever
Argentine hemorrhagic, coagulation studies, 1
hemorrhagic, circulating immune complexes, immunoconglutinins, and rheumatoid factors in nephropathia epidemica, 15
Fevers, viral hemorrhagic, 127
Fibronectin, role in prevention of adherence of *P. aeruginosa* to buccal cells, 784
Finland, Maxwell, Lecture, 375
Fungemia in chronic cavitary pulmonary histoplasmosis, 633
Gastroenteritis, acute infectious nonbacterial, possible new virus serotype isolated during an outbreak in a Marin County convalescent hospital, 791
Gentamicin
intraventricularly administered, central nervous system toxicity in adult rabbits, 148
pharmacokinetics in perilymph and endolymph of rats as determined by radioimmunoassay, 476
resistance, characteristics of a coding plasmid in nosocomial infections with *S. marcescens*, 810
*Giardia muris*, protection against infection by milk containing antibody to *Giardia*, 242
Glycogenosis type Ib, abnormal neutrophil motility related to impaired redistribution of adhesion sites, 447
Granulocytes, destruction of newborn *T. spiralis* larvae, 712
*Haemophilus influenzae*
surface components, 747
type b
antibody response to capsular polysaccharide during bacteremic disease, 32
loss of plasmid DNA coding for β-lactamase during experimental infection, 548
subtyping isolates by outer-membrane protein profiles, 668
virulence studies using clinical isolates and laboratory transformants, 517
*Haemophilus parainfluenzae*, ampicillin-resistant, frequency in children, 495
Hepatitis
B, prevention by vaccine, 301
non-A, non-B
after experimental transmission of malaria by blood inoculation, 200
persistent in experimentally infected chimpanzees, 210
Hepatitis B core antigen, IgM antibody as a diagnostic parameter of acute infection with hepatitis B virus, 803
Hepatitis B virus
changes in markers in chronic infection by treatment with interferon combined with adenine arabinoside, 772
IgM antibody to hepatitis B core antigen as a diagnostic parameter of acute infection, 803
Herpes simplex virus
*E*-5-(2-bromovinyl)-2′-deoxyuridine vs. interferon in systemic treatment of infected athymic nude mice, 846
determinants of latency in a primate model for age and host response to genital infection, 554

sensitivity of acyclovir-resistant mutants to other antiviral drugs, 281
Herpes, virus-induced leukocyte interferon in vesicle fluid from lesions of recurrent labialis, 543
Hexose, stimulation of uptake by human eosinophils with chemotactic factors, 719
Histocompatibility leukocyte antigens, in children with meningococcal meningitis, 854
Histoplasmosis, chronic cavitary pulmonary, fungemia, 633
Homosexual men, prevalence of cytomegalovirus infection, 188
Host defense, decreased, infection prevention in patients by selective antimicrobial modulation of potentially pathogenic bacteria, 644
Hyperalimentation, hematogenous candida endophthalmitis in patients receiving parenteral fluids, 655
Immunity
adoptive humoral, modification murine cytomegalovirus infection, 231
cytomegalovirus-specific humor and cellular, in human pregnancy, 391
infection-derived, duration to cholera, 818
specific cellular and humoral, after immunization with live Towne strain cytomegalovirus vaccine, 585
Immunology
circulating immune complexes, immunoconglutinins, and rheumatoid factors in nephropathia epidemica, 15
cytomegalovirus, 618
isolation of an (O,H,Vi)-free immunoprotective antigenic fraction with mannose receptor-like activity from *S. typhi*, 106
studies of disseminated infection with *A. fumigatus* in nude mice, 726
Immunomodulation, properties of dimethylglycine in humans, 101
Infancy, autarcesis against measles, 752
Infections
genital
herpetic, determinants of latency in a primate model for age and host response, 554
mouse model for study of *N. gonorrhoeae*, 67
new animal model for study with the *C. trachomatis* agent of mouse pneumonitis, 63
nosocomial
characteristics of *S. marcescens* containing a plasmid coding for gentamicin resistance, 810
evolution of a plasmid mediating resistance to multiple antimicrobial agents during a prolonged epidemic, 170
sternal wound, two outbreaks due to organisms of the *M. fortuitum* complex, 533
Influenza virus
adverse reactions, immune response, and observations in the field of type B vaccines in children and adults, 700
effect of killed vaccine on kinetics of normal human lymphocytes, 252
polymorphonuclear leukocyte dysfunction during infection in chinchillas, 836
Interferon
changes in hepatitis B virus markers in chronic infection by combined treatment with adenine arabinoside, 772
cloning, report of a workshop on DNA recombinant technology, 297
virus-induced leukocyte, in vesicle fluid from lesions of recurrent herpes labialis, 543
vs. *E*-5-(2-bromovinyl)-2′-deoxyuridine in systemic treatment of infection with herpes simplex virus in athymic nude mice, 846
Intraventricular administration
central nervous system toxicity of gentamicin in adult rabbits, 148
conflicting views on aminoglycosides in treatment of gram-negative meningitis, 293
Irradiation, $^{60}$Co, inactivation of Ebola virus, 291
Junin virus, immunohistochemical and ultrastructural studies of hemopoietic tissue from infected guinea pigs, 7
Kawasaki syndrome, 317
Keratitis, a case due to *A. castellanii* in New York, New York, and features of 10 cases, 662
Labialis, virus-induced leukocyte interferon in vesicle fluid from recurrent herpes lesions, 543
β-Lactamase, loss of coding plasmid DNA during experimental infection with *H. influenzae* type b, 548
Lancefield, Rebecca Craighill, 1895–1981, obituary, 507
*Legionella pneumophila*
infections in children, 386
intracellular replication, 460
Leukemia, hairy cell, associated infectious complications, 639
Leukocytes
peripheral blood, rescue of a cytopathic paramyxovirus in subacute sclerosing panencephalitis, 396
polymorphonuclear, dysfunction during influenza virus infection in chinchillas, 836
Lipopolysaccharide, purified, of *N. gonorrhoeae*, toxic activity for human fallopian tube mucosa, 432
Lymphocytes
human T, depression of colony formation by rifampin and other antimicrobial agents, 832
impaired transformation response to cytomegalovirus and phytohemagglutinin associated with antithymocyte globulin in renal transplant recipients, 259
in infections with Epstein-Barr virus and cytomegalovirus, 857
normal human, effect of killed influenza virus vaccine on kinetics, 252
Lymph tissue, pharmacokinetics of gentamicin in rats as determined by radioimmunoassay, 476
Lysozyme, effect of ozone on concentrations in phagocytizing alveolar macrophages, 247
Macrophages, phagocytizing alveolar, effect of ozone on lysozyme concentrations, 247
Malaria, subsequent non-A, non-B hepatitis by blood inoculation, 200
Mannose, isolation of an (O,H,Vi)-free immunoprotective antigenic fraction with receptor-like activity from *S. typhi*, 106
Marin agent, a 27-nm virus isolated during an outbreak of acute infectious nonbacterial gastroenteritis in a convalescent hospital, 791
Measles, autarcesis in early infancy, 752
Measles virus, M protein, role in subacute sclerosing panencephalitis, 352
Mecillinam, resistance in *E. coli*, dissociation of growth inhibition and morphologic change, 114

Meningitis
experimental bacterial, pharmacokinetics and bacteriologic efficacy of moxalactam, cefotaxime, cefoperazone, and rocephin, 156
familial cryptococcal, 133
gram-negative
conflicting views on intraventricular use of aminoglycosides in treatment, 293
pharmacokinetics and efficacy of an aminoglycoside (amikacin) administered into cerebral ventricles of neonates, 141
meningococcal, histocompatibility leukocyte antigens in infected children, 854
Meningoencephalitis, primary amoebic, report of two cases and antibiotic and immunologic studies, 193
$Mg^{++}$, involvement in attachment of phagocytic cells to *A. suum* juveniles, 71
Microscopy, electron, of the gonococcal capsule, 796
Milk
antibody responses to live and killed poliovirus vaccines in Pakistani and Swedish women, 707
containing antibody to *Giardia*, protection against infection with *G. muris*, 242
Mitogenicity, atypical interstitial pneumonia induced by *M. pulmonis* membranes in rats, 55, 865
Monoclonal antibodies, 346
Moxalactam, pharmacokinetics and bacteriologic efficacy in experimental bacterial meningitis, 156
Mucosa, adhesin-receptor interactions mediating attachment of bacteria, 325
Mumps, salivary IgA antibodies to virus during and after infection, 617
*Mycobacterium fortuitum*, two outbreaks of sternal wound infections, 533
*Mycobacterium tuberculosis*
influence of virulence on protection induced by bacille Calmette-Guérin vaccine in guinea pigs, 734
low-virulence, influence of vaccination-challenge interval on protective efficacy of bacille Calmette-Guérin vaccine in guinea pigs, 739
*Mycoplasma pneumoniae*, atypical pneumonia and the Armed Forces Epidemiological Board, 305
*Mycoplasma pulmonis*, atypical interstitial pneumonia induced by mitogenic membranes in rats, 55, 865
Myeloma, multiple, antibody response to pneumococcal vaccine in patients, 590
Myxoviruses, functions and inhibition of membrane glycoproteins, 352
*Naegleria fowleri*, report of two cases and antibiotic and immunologic studies of primary meningoencephalitis, 193
Nalidixic acid, efficacy in bacteriuric women and effect on fecal and periurethral carriage of Enterobacteriaceae, 603
*Neisseria gonorrhoeae*
colony type 1 or type 4, observations on damage to human fallopian tubes in organ culture, 413
electron microscopy of capsule, 796
mouse model for study of genital infection, 67
studies of toxicity for human fallopian tube mucosa, 423
toxic activity of purified lipopolysaccharide for human fallopian tube mucosa, 432
*Neisseria meningitidis*
groups A and C, antibody response to capsular polysaccharides during bacteremic disease, 32
influence of pili and type of receptor cell on attachment to human mucosal surfaces, 525
Neonates, pharmacokinetics and efficacy of an aminoglycoside (amikacin) administered into cerebral ventricles as therapy for gram-negative meningitis, 141
Nephropathia epidemica, circulating immune complexes, immunoconglutinins, and rheumatoid factors, 15
Neurology, isolation of paramyxoviruses from patients with chronic disease, 501
Neutrophils
abnormal motility related to impaired redistribution of adhesion sites in glycogenosis type Ib, 447
esterase dependence of lysozyme secretion, spontaneous migration, and continuity of the respiratory burst, 94
human polymorphonuclear, interaction with *E. histolytica*, 83
Oleic acid, enhancement of phagocytosis of group A streptococci M type 6, 570
Ozone, effect on lysozyme concentrations in phagocytizing alveolar macrophages, 247
Paramyxoviruses
cytopathic, rescue from peripheral blood leukocytes in subacute sclerosing panencephalitis, 396
functions and inhibition of membrane glycoproteins, 352
isolation from patients with chronic neurologic diseases, 501
Parasites, destruction of newborn *T. spiralis* larvae by human antibodies and granulocytes, 712
Pathogenesis
adherence of *C. albicans* to human vaginal and buccal epithelial cells, 76
influence of pili and type of receptor cell on attachment of *N. meningitidis* to human mucosal surfaces, 525
observations on damage to human fallopian tubes in organ culture by *N. gonorrhoeae* colony type 1 or type 4, 413
persistent non-A, non-B hepatitis in experimentally infected chimpanzees, 210
rheumatic fever (Maxwell Finland Lecture), 375
role of fibronectin in prevention of adherence of *P. aeruginosa* to buccal cells, 784
stages and role of capsule in attachment of *E. coli* strain RDEC-1 to intestinal epithelial cells in diarrheal rabbits, 219
the Peyer's patch as the initial site of attachment and colonization of *E. coli* strain RDEC-1 in diarrheal rabbits, 440
Pathogenicity
atypical interstitial pneumonia induced by mitogenic *M. pulmonis* membranes in rats, 55, 865
cytomegalovirus, 618
Pathophysiology, role of endorphins in experimental shock, 863
Peyer's patch, initial site of attachment and colonization of *E. coli* strain RDEC-1 in diarrheal rabbits, 440
Phagocytosis
effect of ozone on lysozyme concentrations in alveolar macrophages, 247
enhancement by oleic acid of group A streptococci M type 6, 570

involvement of sugars and $Mg^{++}$ in attachment of cells to *A. suum* juveniles, 71
Pharmacokinetics
of amikacin administered into cerebral ventricles of neonates as therapy for gram-negative meningitis, 141
of gentamicin in perilymph and endolymph of rats as determined by radioimmunoassay, 476
of moxalactam, cefotaxime, cefoperazone, and rocephin in experimental bacterial meningitis, 156
Phytohemagglutinin, association of impaired lymphocyte transformation response with antithymocyte globulin in renal transplant recipients, 259
Pili, influence on attachment of *N. meningitidis* to human mucosal surfaces, 525
Plasmid
DNA coding for β-lactamase, loss during experimental infection with *H. influenzae* type b, 548
mediating resistance to multiple antimicrobial agents during a prolonged epidemic of nosocomial infections, 170
*S. marcescens*, coding for gentamicin resistance in nosocomial infections, 810
Plasmids, role in adherence of invasive *E. coli* to mammalian cells, 286
Pneumonia
atypical
and the Armed Forces Epidemiological Board, 305
interstitial, induced by mitogenic *M. pulmonis* membranes in rats, 55, 865
due to *C. trachomatis* in immunocompromised (nude) mice, 228
Pneumonitis
mouse *C. trachomatis* agent
effect in immunocompromised (nude) mice, 238
new animal model for study of genital infections, 63
Poliovirus, antibody responses to live and killed vaccines in milk of Pakistani and Swedish women, 707
Polyriboinosinic-polyribocytidylic acid, systemic treatment of infection with herpes simplex virus in athymic nude mice, 846
Polysaccharide
capsular
antibody responses to groups A and C *N. meningitidis* and *H. influenzae* type b during bacteremic disease, 32
virulence studies using clinical isolates and laboratory transformants of *H. influenzae*, 517
slime, role in infections with *P. aeruginosa*, 755
Pregnancy
colonization of Mexican women with group B *Streptococcus*, 134
cytomegalovirus-specific humoral and cellular immune responses, 391
genital and intestinal carriage of group B streptococci, 761
infections due to Epstein-Barr virus, 499
Presidential address, Infectious Diseases Society of America, 305
Primate, model for age and host response to genital herpetic infection, determinants of latency, 554
Prophylaxis, biweekly doxycycline for travelers' diarrhea, 598
Protein binding, effect of free fatty acids on antimicrobial agents, 609
Proteins, outer-membrane, subtyping isolates of *H. influenzae* type b by profiles, 668
*Pseudomonas aeruginosa*
role of
fibronectin in prevention of adherence to buccal cells, 784
slime polysaccharide in infections, 755
Pyelonephritis, acute, bacteria-specific antibody in urine of patients, 404
Receptor cell, influence on attachment of *N. meningitidis* to human mucosal surfaces, 525
Receptors, adhesin interactions mediating attachment of bacteria to mucosal surfaces, 325
Renal transplant recipients
association of antithymocyte globulin with impaired lymphocyte transformation response to cytomegalovirus and phytohemagglutinin, 259
bacteremia due to *B. fragilis* after elective appendectomy, 635
Resistance, transferable, to trimethoprim in *Shigella*, 742
Rhabdomyolysis, acute, associated with adenovirus infection, 133
Rheumatic fever, an adventure in the pathogenetic maze (Maxwell Finland Lecture), 375
*Rickettsia tsutsugamushi*, clinical and immunologic responses of silvered leaf monkeys to experimental reinfection, 558
Rifampin, depression of colony formation by human T lymphocytes, 832
RNA, immune, isolated from spleens of mice infected with *T. cruzi*, fractionation, 827
Rocephin, pharmacokinetics and bacteriologic efficacy in experimental bacterial meningitis, 156
Rubella, evaluation of commercially available diagnostic test kits, 578
*Salmonella*
reported isolates from cerebrospinal fluid in the United States, 1968–1979, 504
reports of bacteremia to the Centers for Disease Control, 1968–1979, 743
*Salmonella typhi*, isolation of an (O,H,Vi)-free immunoprotective antigenic fraction with mannose receptor–like activity, 106
*Salmonella typhimurium*, virulence in mice of epidemic isolates from children, 465
*Serratia marcescens*, plasmid coding for gentamicin resistance in nosocomial infections, 810
*Shigella*
family illness associated with infection, 130
transferable resistance to trimethoprim, 742
Shigellosis, single-dose ampicillin therapy in Bangladesh, 164
Shock, pathophysiologic role of endorphins, 862
Smadel, Joseph E., Memorial Lecture, 364
Staphylococcal protein A, $^{125}I$-labeled, rapid radioimmunoassay for antibody to varicella-zoster virus, 693
*Staphylococcus aureus*, identification and characterization of an exotoxin associated with toxic-shock syndrome, 509
Streptococci
group A, M type 6, enhancement of phagocytosis with oleic acid, 570
group B
colonization of Mexican pregnant women, 134

genital and intestinal carriage during pregnancy, 761
type III, pharmacokinetics and bacteriologic efficacy of moxalactam, cefotaxime, cefoperazone, and rocephin in experimental meningitis, 156
Subacute sclerosing panencephalitis
rescue of a cytopathic paramyxovirus from peripheral blood leukocytes, 396
role of measles virus M protein, 352
Sugars, involvement in attachment of phagocytic cells to *A. suum* juveniles, 71
Surface components of *H. influenzae*, 747
Surgery, two outbreaks of sternal wound infections due to organisms of the *M. fortuitum* complex, 533
Synergy, antibiotic, correlations between methods for measurement, 757
Thymus, diminution in size in mice during forced swimming, 292
Toxicity
intraventricularly administered gentamicin in the central nervous system of adult rabbits, 148
*N. gonorrhoeae* for human fallopian tube mucosa, 423
purified lipopolysaccharide of *N. gonorrhoeae* for human fallopian tube mucosa, 432
Toxic-shock syndrome
identification and characterization of *S. aureus* exotoxin, 509
toxins, 631
Toxin, type G botulinal, identification in five sudden unexpected deaths, 22
Toxins, *S. aureus* and toxic-shock syndrome, 631
Trachoma, extraocular infections in children in areas with endemic disease, 853
*Trichinella spiralis*, destruction of newborn larvae by human antibodies and granulocytes, 712
Trimethoprim, transferable resistance in *Shigella*, 742
*Trypanosoma cruzi*, fractionation of immune RNA isolated from spleens of infected mice, 827
Vaccine
bacille Calmette-Guérin
effect of virulence of *M. tuberculosis* on protection in guinea pigs, 734
influence of vaccination-challenge interval on protective efficacy against low-virulence *M. tuberculosis* in guinea pigs, 739
initiatives against cytomegalovirus, 618
influenza B virus, adverse reactions, immune response, and observations in the field of children and adults, 700
killed influenza virus, effect on kinetics of normal human lymphocytes, 252
live and killed poliovirus, antibody responses in milk of Pakistani and Swedish women, 707
live Towne strain cytomegalovirus, specific cellular and humoral immunity after immunization, 585
pneumococcal, antibody responses in patients with multiple myeloma, 590
prevention of hepatitis B, 301
respiratory and gastrointestinal tract viruses, strategy for development in the 1980s (Joseph E. Smadel Memorial Lecture), 364
Varicella-zoster virus
diagnosis of infections by countercurrent immunoelectrophoresis, 274
radioimmunoassay using $^{125}$I-labeled staphylococcal protein A for antibody, 693
soluble skin test antigen prepared from fluid of infected cultures, 684
*Vibrio cholerae*
duration of infection-derived immunity, 818
serogroup O1, serologic studies of naturally acquired infection in the United States, 182
Viruses
gastrointestinal tract, strategy for development of vaccines in the 1980s (Joseph E. Smadel Memorial Lecture), 364
infection of endothelial cells, 266
respiratory tract, strategy for development of vaccines in the 1980s (Joseph E. Smadel Memorial Lecture), 364

CONTENTS

**Original Investigations**

Hemorrhagic Fevers

Coagulation Studies in Argentine Hemorrhagic Fever — Felisa C. Molinas, Maria M. E. de Bracco, and Julio I. Maiztegui — 1

Junin Virus Infection of Guinea Pigs: Immunohistochemical and Ultrastructural Studies of Hemopoietic Tissue — G. Carballal, P. M. Cossio, R. P. Laguens, C. Ponzinibbio, J. R. Oubiña, P. C. Meckert, A. Rabinovich, and R. M. Arana — 7

Circulating Immune Complexes, Immunoconglutinins, and Rheumatoid Factors in Nephropathia Epidemica — K. Penttinen, J. Lähdevirta, R. Kekomäki, B. Ziola, A. Salmi, A. Hautanen, P. Lindström, A. Vaheri, M. Brummer-Korvenkontio, and O. Wager — 15

Infectious Diseases

Isolation of *Clostridium botulinum* Type G and Identification of Type G Botulinal Toxin in Humans: Report of Five Sudden Unexpected Deaths — O. Sonnabend, W. Sonnabend, R. Heinzle, T. Sigrist, R. Dirnhofer, and U. Krech — 22

Nosocomial Conjunctivitis Caused by Adenovirus Type 4 — Roland A. Levandowski and Mary Rubenis — 28

Antibody Response to Capsular Polysaccharides of Groups A and C *Neisseria meningitidis* and *Haemophilus influenzae* Type b during Bacteremic Disease — Helena Käyhty, Hannele Jousimies-Somer, Heikki Peltola, and P. Helena Mäkelä — 32

Isolation of *Clostridium difficile* from the Environment and Contacts of Patients with Antibiotic-Associated Colitis — K.-H. Kim, R. Fekety, D. H. Batts, D. Brown, M. Cudmore, J. Silva, Jr., and D. Waters — 42

Experimental Medicine

Studies on the Epidemiology of Colitis Due to *Clostridium difficile* in Hamsters — Renu Toshniwal, Joseph Silva, Jr., Robert Fekety, and Kyung-Hee Kim — 51

Mitogenicity and Pathogenicity of *Mycoplasma pulmonis* in Rats. I. Atypical Interstitial Pneumonia Induced by Mitogenic Mycoplasmal Membranes — Yehudith Naot, Sima Davidson, and Ella S. Lindenbaum — 55

A New Animal Model for the Study of *Chlamydia trachomatis* Genital Infections: Infection of Mice with the Agent of Mouse Pneumonitis — Almen L. Barron, Harold J. White, Roger G. Rank, Bernard L. Soloff, and Estelle B. Moses — 63

A Mouse Model for the Study of Gonococcal Genital Infection — Eiji Kita, Hiroshi Matsuura, and Shuzo Kashiba — 67

Pathogenesis

The Involvement of Sugars and $Mg^{++}$ in the Attachment of Phagocytic Cells to *Ascaris suum* Juveniles — M. E. Nuessen and E. L. Jeska — 71

## Subject Index

Addicts, drug, with endocarditis, recovery of *P. aeruginosa* from syringes, 482
Adhesion, of *E. histolytica* trophozoites to monolayers of human cells, 539
Adults, characterization of infecting strains of *H. influenzae* by serotypes, biotypes, and β-lactamase production, 101
Aging, overcoming resistance of neonatal human lymphoid cells in culture to infection by herpes simplex virus, 547
Allograft, renal, *U. urealyticum* in the upper urinary tracts of recipients, 123
Amantadine, toxicity for ciliated epithelium of ferret tracheal rings, 77
Amoebae, adhesion of *E. histolytica* trophozoites to monolayers of human cells, 539
Ampicillin, efficacy with a β-lactamase inhibitor (CP-45,899) in experimental endocarditis due to *S. aureus*, 237
Anaerobes in mixed infections, 181
Anaerobic culture conditions, decreased antimicrobial activity against *S. epidermidis*, 485
Antibacterial effect, impairment, of bladder surface mucin by protamine sulfate, 180
Antibiotic
  artificial capillary in vitro kinetic model of bactericidal activity, 583
  solutions, stability of cephalosporins in commercially obtained sera, 483
Antibiotics
  antistaphylococcal activity with rifampin, 365
  β-lactam, regrowth of *P. aeruginosa* and other bacteria after bactericidal action, 263
Antibodies
  human, to somatic components of a polysaccharide-protein complex from *H. influenzae* type b, 521
  to cell wall peptidoglycan of *S. aureus* in patients with serious staphylococcal infections, 1, 614
  to *E. coli* lipid A during urinary tract infection, 319
Antibody
  response
    IgM, to staphylococcal infection, 307
    to nasopharyngeal carriage of *S. pneumoniae* types 3, 19, and 23 in infants, 312
  to hepatitis B **e** antigen
    and rheumatoid factor, 292
    nonidentity with rheumatoid factor, 283
Antimicrobial
  activity, decreased, against *S. epidermidis* under anaerobic culture conditions, 485
  susceptibility tests and their clinical relevance, 380
9-β-D-arabinofuranosyladenine-5′-phosphate, effect of liver disease on pharmacokinetics and toxicity, 358
Babesiosis, human, clinical characteristics, 481
Bacteria, gram-negative, type-specific vs. cross-protective vaccination, 599
Bactericidal activity, antibiotic, artificial capillary in vitro kinetic model, 583
Bacteriuria, asymptomatic, anaerobic and other fastidious microorganisms in pregnant women, 114
Biotypes, of isolates of *H. influenzae* type b, comparison with outer-membrane protein subtypes, 480
Bladder, impairment of antibacterial effect of surface mucin by protamine sulfate, 180
Bone marrow cultures, value in diagnosing fungal and mycobacterial infection in patients with cancer, 79, 614
*Bordetella bronchiseptica*, improved system for studying the effect on ciliary activity of canine tracheal epithelial cells, 349
*Branhamella catarrhalis*, preliminary serologic evidence for a pathogenic role, 570
Cancer, value of bone marrow cultures in diagnosing fungal and mycobacterial infection in patients, 79, 614
*Candida albicans*
  production of germ tubes by virulent and attenuated strains, 565
  resistance of virulent and attenuated strains to intracellular killing by human and mouse phagocytes, 557
Candidiasis, in leukemic patients, detection of antibodies and antigenemia by enzyme-linked immunosorbent assay, 24
Capillary, artificial in vitro kinetic model of antibiotic bactericidal activity, 583
Carbenicillin, regrowth of *P. aeruginosa* and other bacteria after bactericidal action, 263
Cardiomyopathy, dilated-type, mouse model with coxsackievirus B3, 232
Central nervous system
  measles virus genome in infections, 154
  selective disappearance of measles virus matrix protein in experimental subacute sclerosing panencephalitis, 161
Cephalosporins, stability in commercially obtained sera, 483
Chemiluminescence, of granulocytes from patients with chronic granulomatous disease, role of myeloperoxidase and bacterial metabolism, 344
Children, patterns of shedding of myxoviruses and paramyxoviruses, 433
*Chlamydia trachomatis*, association of infection with Fitz-Hugh-Curtis syndrome, 176
Chronic granulomatous disease, role of myeloperoxidase and bacterial metabolism in chemiluminescence of granulocytes from patients, 344
Cilia, canine tracheal epithelial cells, improved system for studying the effect of *B. bronchiseptica*, 349
*Citrobacter diversus*, epidemic nosocomial meningitis in neonates, 203
Clindamycin, uptake by human neutrophils, 472
*Clostridium difficile*, enzyme immunoassay for detection of antigen, 378
Complement
  eighth component, deficiency associated with lack of IgA in a patient with recurrent bacterial meningitis, 399
  third component, cleavage by neutral proteases from granulocytes in pleural empyema, 499
*Coxiella burnetii*, cryptic epidemic of Q fever in a medical school, 107
Coxsackievirus B3, mouse model of dilated-type cardiomyopathy, 232
*Cryptosporidium*, diarrhea in young red deer associated with infection, 170
Cytomegalovirus
  vaccines, 494

virus-monocyte interactions in mononucleosis, 47
Day-care centers, spread of disease and outer-membrane protein subtypes of *H. influenzae* type b, 210
Diarrhea
acute, nonenteric sources of rotavirus, 495
in young red deer associated with infection with *Cryptosporidium*, 170
travelers', in Panamanian tourists in Mexico, 442
Echovirus type 11, temperature sensitivity of isolates causing chronic meningoencephalitis in an agammaglobulinemic patient, 377
Elderly population, outbreak of influenza B, 297
Empyema, pleural, cleavage of C3 by neutral proteases from granulocytes, 499
*Encephalitozoon cuniculi*, susceptibility of selected inbred strains of mice, 249
Endocarditis
due to *S. aureus*, efficacy of ampicillin plus a β-lactamase inhibitor (CP-45,899), 237
recovery of *P. aeruginosa* from syringes of drug addicts, 482
Endotoxin, reference *E. coli*, properties in humans, 329
*Entamoeba histolytica*, adhesion of trophozoites to monolayers of human cells, 539
Enzyme immunoassay
for detection of *C. difficile* antigen, 378
measurement of *P. carinii* antigen, 484
Enzyme immunoassays, evaluation for detection of human rotavirus, 379
Enzyme-linked immunosorbent assay
comparison of larval antigens for diagnosis of strongyloidiasis in humans, 427
detection of antibodies and antigenemia in leukemic patients with candidiasis, 24
Epidemiology
antibody response in infants to nasopharyngeal carriage of *S. pneumoniae* types 3, 19, and 23, 312
cryptic epidemic of Q fever in a medical school, 107
epidemic nosocomial meningitis due to *C. diversus* in neonates, 203
hospital, changing role of the specialist in infectious diseases, 609
improved accuracy and specificity of forecasting deaths attributed to pneumonia and influenza, 606
Korean hemorrhagic fever among rural residents in Japan, 460
nosocomial infections in a neonatal intensive care unit, 449
outer-membrane protein subtypes of *H. influenzae* type b and spread of disease in day-care centers, 210
prospective study of rotavirus infection in infants and young children, 218
risk factors for infections of the oropharynx and the respiratory tract in patients with acute leukemia, 128
*S. enteriditis* serotype *derby* and consumption of raw milk, 608
*Escherichia coli*
phagocytosis and killing by purified human lung phagocytes, 61
properties of reference endotoxin and phthalylated derivative in humans, 329
regrowth after bactericidal action of carbenicillin and other β-lactam antibiotics, 263
Fecal flora, patterns in patients with acute leukemia, 10
Fever, Korean hemorrhagic, among rural residents in Japan, 460
Fibroblasts, stimulation in vitro by soluble products of schistosomal egg granulomas, 254
Fitz-Hugh-Curtis syndrome, association with infection with *C. trachomatis*, 176
Fungal infection, value of bone marrow cultures in diagnosis for patients with cancer, 79, 614
*Gardnerella vaginalis*
in asymptomatic bacteriuria in pregnant women, 114
in the urinary tracts of renal allograft recipients, 123
Genetics
measles, histocompatibility leukocyte antigen polymorphism, and natural selection in humans, 142
relationship of background to hepatosplenic disease due to *S. mansoni* and modulation in mice, 148
susceptibility of selected strains of mice to *E. cuniculi*, 249
Genome, measles virus, in infections of the central nervous system, 154
Graft-vs.-host disease, deficiency of intestinal immunity in humans, 38
Granulocytes
from patients with chronic granulomatous disease, role of myeloperoxidase and bacterial metabolism in chemiluminescence, 344
in pleural empyema, cleavage of C3 by neutral proteases, 499
*Haemophilus influenzae*
characterization of strains infecting adults by serotypes, biotypes, and β-lactamase production, 101
type b
comparison of outer-membrane protein subtypes and biotypes of isolates, 480
outer-membrane protein subtypes and spread of disease in day-care centers, 210
polysaccharide-protein complex
activity in weanling rabbits and human T lymphocytes, 509
human antibodies to its somatic components, 521
vaccine trial in human adults, 530
Hepatitis A virus, human, susceptibility of stump-tailed monkeys, 55
Hepatitis B, correlation between viral replication and clinical course, 303
Hepatitis B surface antigen
positive, severe chronic active disease, temporary disappearance of viral replication, 282
significance of serologic, histologic, and immunohistologic findings in the prognosis of 88 asymptomatic carriers, 33
Hepatitis B virus
risk of
accidental exposure via blood contamination in medical students, 604
transmission using jet injection in inoculation, 179
Hepatitis, non-A, non-B, in chimpanzees and marmosets, 588
Herpes simplex virus
differences in neurovirulence among isolates of types 1 and

2 in mice using four routes of infection, 464
resistance of neonatal human lymphoid cells to infection overcome by aging cells in culture, 547
type 1, selective uptake of [$^{125}$I]iododeoxycytidine by infected cells, 78
Histocompatibility leukocyte antigens, polymorphism, measles, and natural selection in humans, 142
Host defenses, effects of influenza, 284
Hypersensitivity, delayed, lack of effect of infection with influenza virus on induction and expression, 280
IgA, deficiency associated with lack of C8 in a patient with recurrent bacterial meningitis, 399
Imidazole, activity against chloroquine-resistant *P. falciparum*, 372
Immune responsiveness, influence of dietary lactalbumin hydrolysate, 281
Immunity
antibacterial, suppression by infection with influenza virus, 225
humoral and cell-mediated, to rubella virus, persistence in cloistered nuns and in schoolteachers, 137
inhibition of in vitro growth of *F. falciparum* by serum from infected owl monkeys, 270
intestinal, deficiency with graft-vs.-host disease in humans, 38
suppression of IgM antibody response by formalin-inactivated mumps virus vaccine, 496
Immunization, impact on epidemic measles and rubella in air force recruits, 403
Immunosuppression, virus-monocyte interactions in cytomegalovirus mononucleosis, 47
Infants, prospective study of rotavirus infection, 218
Infection control, changing role of the specialist in infectious diseases, 609
Infection route, differences in neurovirulence among isolates of herpes simplex virus types 1 and 2 in mice, 464
Infectious diseases, changing role of the specialist in hospital epidemiology and infection control, 609
Influenza
effects on host defenses, 284
improved accuracy and specificity of forecasting attributed deaths, 606
Influenza B, outbreak in an elderly population, 297
Influenza virus
effects of infection on function in human polymorphonuclear leukocytes, 279
lack of effect of infection on induction and expression of delayed hypersensitivity, 280
suppression of antibacterial immunity by infection, 225
Inoculation, risk of transmission of hepatitis B virus using jet injection, 179
Interferon, depression of natural killer cell activity, 605
Iododeoxycytidine, selective uptake in cells infected with herpes simplex virus type 1, 78
Lactalbumin hydrolysate, dietary, influence on the immune system of mice and resistance to salmonellosis, 281
β-Lactamase inhibitor (CP-45,899), efficacy with ampicillin in experimental endocarditis due to *S. aureus*, 237
Larva, comparison of antigens in an enzyme-linked immunosorbent assay for strongylodiasis in humans, 427
Legionnaires' disease, serologic differentiation from psittacosis, 92
Leukemia
acute
patterns of oropharyngeal and fecal flora in patients, 10
risk factors for infections of the oropharynx and the respiratory tract in patients, 128
detection of antibodies to *Candida* and antigenemia by enzyme-linked immunosorbent assay, 24
Leukocytes
human polymorphonuclear
association of virulence of *V. vulnificus* with resistance to phagocytosis, 244
effects of infection with influenza virus on function, 279
Lipid A, antibodies during urinary tract infection, 319
Liver disease, effect on pharmacokinetics and toxicity of 9-β-D-arabinofuranosyladenine-5′-phosphate, 358
Lymphocytes, human T, activity of polysaccharide-protein complex from *H. influenzae* type b, 509
Lymphoid cells, neonatal human, resistance to infection by herpes simplex virus overcome by aging cells in culture, 547
Marmosets, non-A, non-B hepatitis, 588
*Mastomys natalensis* species complex, susceptibility to experimental infection with *Y. pestis*, 80
Measles
histocompatibility leukocyte antigen polymorphism and natural selection in humans, 142
impact of immunization on epidemics in air force recruits, 403
Measles virus
genome in infections of the central nervous system, 154
selective disappearance of matrix protein from the central nervous system in experimental subacute sclerosing panencephalitis, 161
Meningitis
epidemic nosocomial, due to *C. diversus* in neonates, 203
recurrent bacterial, associated with C8 and IgA deficiency, 399
Meningoencephalitis, chronic, temperature sensitivity of isolates of echovirus type 11 from an agammaglobulinemic patient, 372
Methicillin, microbiologic characteristics, antimicrobial susceptibilities, and assessment of virulence of an epidemic strain of resistant *S. aureus*, 575
Mice
relationship of genetic background to hepatosplenic disease due to *S. mansoni* and modulation, 148
susceptibility of selected inbred strains to *E. cuniculi*, 249
Microorganisms, anaerobic and other fastidious, in asymptomatic bacteriuria in pregnant women, 114
Milk, raw, consumption and *S. enteritidis* serotype *derby*, 608
Monkeys
owl, inhibition of in vitro growth of *P. falciparum* by immune serum, 270
stump-tailed, susceptibility to human hepatitis A virus, 55
Monocytes
augmentation of selective functions in tuberculosis, 391
interactions with virus in cytomegalovirus mononucleosis, 47
Mononucleosis, cytomegalovirus, virus-monocyte interactions, 47
Moxalactam, paradoxic and tolerant effects on *S. aureus*, 178

Mucin, bladder surface, impairment of antibacterial effect by protamine sulfate, 180
Mumps virus, suppression of IgM antibody response by formalin-inactivated vaccine, 496
Mycobacterial infection, value of bone marrow cultures in diagnosis for patients with cancer, 79, 614
Myeloperoxidase, role in chemiluminescence of granulocytes from patients with chronic granulomatous disease, 344
Myxoviruses, patterns of shedding in children, 433
Natural killer cells, depression of activity by interferon, 605
*Neisseria gonorrhoeae*
  penicillinase-producing, infections in the United States in 1976–1980, 191
  vancomycin-sensitive, 198
Neonates
  epidemic nosocomial meningitis due to *C. diversus*, 203
  nosocomial infections in an intensive care unit, 449
  penicillin tolerance in group B streptococcal isolates, 411
  production of leukocytic pyrogen from phagocytes, 337
Neurovirulence, differences among isolates of herpes simplex virus types 1 and 2 in mice using four routes of infection, 464
Neutrophils
  human
    polymorphonuclear, phagocytosis and algicidal activity against *P. wickerhamii*, 72
    uptake of clindamycin, 472
Nomenclature, bacterial, a proposed change, 85
Oropharyngeal flora, patterns in patients with acute leukemia, 10
Oropharynx, risk factors for infections in patients with acute leukemia, 128
Otitis media, preliminary serologic evidence for a pathogenic role of *B. catarrhalis*, 570
Outer-membrane protein of *H. influenzae* type b
  comparison of subtypes with biotypes of isolates, 480
  subtypes and spread of disease in day-care centers, 210
Paramyxoviruses, patterns of shedding in children, 433
Parasitology
  inhibition of in vitro growth of *P. falciparum* by immune serum from owl monkeys, 270
  relationship of genetic background in mice to hepatosplenic disease due to *S. mansoni* and modulation, 148
  stimulation in vitro of fibroblasts by soluble products of schistosomal egg granulomas, 254
  susceptibility of selected inbred strains of mice to *E. cuniculi*, 249
Penicillin, tolerance in group B streptococci isolated from infected neonates, 411
Penicillinase, production by *N. gonorrhoeae* causing infections in the United States in 1976–1980, 191
Peptidoglycan, cell wall, of *S. aureus*, antibodies in patients with serious staphylococcal infections, 1, 615
Pertussis, vaccine efficacy in the United States in 1979, 187
Phagocytes
  human and mouse, resistance of virulent and attenuated strains of *C. albicans* to intracellular killing, 557
  of neonates, production of leukocytic pyrogen, 337
  purified human lung, phagocytosis, bacterial killing, and metabolism, 61
Pharmacokinetics, of 9-β-D-arabinofuranosyladenine-5′-phosphate, effect of liver disease, 358
*Plasmodium falciparum*
  chloroquine-resistant, imidazole and polyene activity, 372
  inhibition of in vitro growth by immune serum from owl monkeys, 270
*Pneumocystis carinii*, measurement of antigen by enzyme immunoassay, 484
Pneumonia
  due to *S. aureus*, during mechanical ventilation, 19
  gram-negative bacterial, type-specific vs. cross-protective vaccination, 599
  improved accuracy and specificity of forecasting attributed deaths, 606
Polyene, activity against chloroquine-resistant *P. falciparum*, 372
Polysaccharide-protein complex from *Haemophilus influenzae* type b
  activity in weanling rabbits and human T lymphocytes, 509
  human antibodies to its somatic components, 521
  vaccine trial in human adults, 530
Pregnant women, anaerobic and other fastidious microorganisms in asymptomatic bacteriuria, 114
Protamine sulfate, impairment of antibacterial effect of bladder surface mucin, 180
Proteases, neutral, from granulocytes in pleural empyema, cleavage of C3, 499
*Prototheca wickerhamii*, phagocytosis and algacidal activity of human polymorphonuclear neutrophils, 72
*Pseudomonas aeruginosa*
  recovery from syringes of drug addicts with endocarditis, 482
  regrowth after bactericidal action of carbencillin and other β-lactam antibiotics, 263
Psittacosis, serologic differentiation from Legionnaires' disease, 92
Pyrogen, leukocytic, production from phagocytes of neonates, 337
Q fever, cryptic epidemic in a medical school, 107
Respiratory tract, risk factors for infections in patients with acute leukemia, 128
Rheumatoid factor
  and antibody to hepatitis B e antigen, 292
  nonidentity with antibody to hepatitis B e antigen, 283
Rifampin
  antistaphylococcal activity with other antibiotics, 365
  effect on nasal carriers of coagulase-positive staphylococci, 177
Rimantadine, toxicity for ciliated epithelium of ferret tracheal rings, 77
Rotavirus
  human, evaluation of enzyme immunoassays for detection, 379
  nonenteric sources in acute diarrhea, 495
  prospective study of infection in infants and young children, 218
Rubella, impact of immunization on epidemics in air force recruits, 403
Rubella virus, persistence of humoral and cell-mediated immunity in cloistered nuns and in schoolteachers, 137
*Salmonella enteritidis* serotype *derby*, and consumption of raw milk, 608
Salmonellosis, influence of dietary lactalbumin hydrolysate on resistance in mice, 281

*Schistosoma mansoni*, relationship of genetic background of mice to hepatosplenic disease and modulation, 148
*Schistosoma mekongi*, infection in Southeast Asian refugees, 420
Schistosomiasis, stimulation in vitro of fibroblasts by soluble products of egg granulomas, 254
Serology, differentiation of Legionnaires' disease and psittacosis, 92
Serum, commercially obtained, stability of cephalosporins, 483
Sexually transmitted diseases, funds for research, 94
Staphylococcal infection, IgM antibody response, 307
Staphylococci
  activity of rifampin with other antibiotics, 365
  coagulase-positive, effect of rifampin on nasal carriers, 177
*Staphylococcus aureus*
  antibodies to cell wall peptidoglycan in patients with serious staphylococcal infections, 1, 614
  efficacy of ampicillin plus a β-lactamase inhibitor (CP-45,899) in experimental endocarditis, 237
  in toxic-shock syndrome, 386
  methicillin-resistant, microbiologic characteristics, antimicrobial susceptibilities, and assessment of virulence of an epidemic strain, 575
  paradoxic and tolerant effects of moxalactam, 178
  phagocytosis and killing by purified human lung phagocytes, 61
  pneumonia during mechanical ventilation, 19
  regrowth after bactericidal action of carbenicillin and other β-lactam antibiotics, 263
*Staphylococcus epidermidis*, decreased antimicrobial activity under anaerobic culture conditions, 485
Streptococci, group B, penicillin tolerance in isolates from infected neonates, 411
*Streptococcus pneumoniae*, epidemiologic studies of antibody response to carriage of types 3, 19, and 23 in infants, 312
Strongyloidiasis, comparison of larval antigens in an enzyme-linked immunosorbent assay for diagnosis in humans, 427
Subacute sclerosing panencephalitis, experimental, selective disappearance of measles virus matrix protein from the central nervous system, 161
Surveillance cultures, 81
Temperature sensitivity, of isolates of echovirus type 11 causing chronic meningoencephalitis in an agammaglobulinemic patient, 377
Tetanus toxoid, reaction proneness, 376
Toxic-shock syndrome, *S. aureus*, 386
Trachea, toxicity of amantadine and rimantadine for ciliated epithelium of ferrets, 77
Tuberculosis, augmentation of selective monocyte functions, 391
*Ureaplasma urealyticum*
  in asymptomatic bacteriuria in pregnant women, 114
  in the upper urinary tracts of renal allograft recipients, 123
Urinary tract
  infection, antibodies to *E. coli* lipid A, 319
  upper, *U. urealyticum* in renal allograft recipients, 123
Vaccination, type-specific vs. cross-protective, for gram-negative bacterial pneumonia, 599
Vaccine
  efficacy against pertussis in the United States in 1979, 187
  formalin-inactivated mumps virus, suppression of IgM antibody response, 496
  trial in human adults of polysaccharide-protein complex from *H. influenzae* type b, 530
Vaccines
  cost-effectiveness and cost-benefit analyses, 486
  cytomegalovirus, 494
Vancomycin, sensitive *N. gonorrhoeae*, 198
*Vibrio vulnificus*, association of virulence with resistance to phagocytosis by human polymorphonuclear leukocytes, 244
Yellow fever, summary of a symposium, 87
*Yersinia pestis*, susceptibility of members of the *M. natalensis* species complex to experimental infection, 80

*Volume 144* • *July 1981* • *Number 1*

CONTENTS

**Original Articles**

Clinical Investigations

| | | |
|---|---|---|
| Antibodies to Cell Wall Peptidoglycan of *Staphylococcus aureus* in Patients with Serious Staphylococcal Infections | Henri A. Verbrugh, Roel Peters, Maja Rozenberg-Arska, Phillip K. Peterson, and J. Verhoef | 1 |
| Patterns of Oropharyngeal and Fecal Flora in Patients with Acute Leukemia | V. Fainstein, V. Rodriguez, M. Turck, G. Hermann, B. Rosenbaum, and G. P. Bodey | 10 |
| Pneumonia Due to *Staphylococcus aureus* During Mechanical Ventilation | F. Espersen and J. Gabrielsen | 19 |

Medical Microbiology

| | | |
|---|---|---|
| Detection of Antibodies and Antigenemia in Leukemic Patients with Candidiasis by Enzyme-Linked Immunosorbent Assay | K. L. Meckstroth, E. Reiss, J. W. Keller, and L. Kaufman | 24 |
| The Significance of Serologic, Histologic, and Immunohistologic Findings in the Prognosis of 88 Asymptomatic Carriers of Hepatitis B Surface Antigen | H.-H. Dormeyer, W. Arnold, H. Schönborn, B. Braun, O. Klinge, U. Pfeifer, J. Knolle, G. Hess, P. Kryger, J. O. Nielsen, and K.-H. Meyer zum Büschenfelde | 33 |

Immunology and Host Defense

| | | |
|---|---|---|
| Deficiency of Intestinal Immunity with Graft-vs.-Host Disease in Humans | William E. Beschorner, John H. Yardley, Peter J. Tutschka, and George W. Santos | 38 |
| Mechanisms of Immunosuppression in Cytomegalovirus Mononucleosis. II. Virus-Monocyte Interactions | Walter P. Carney and Martin S. Hirsch | 47 |

Experimental Medicine

| | | |
|---|---|---|
| Susceptibility of Monkeys to Human Hepatitis A Virus | J. S. Mao, Y. Y. Go, H. Y. Huang, P. H. Yu, B. Z. Huang, Z. S. Ding, N. L. Chen, J. H. Yu, and R. Y. Xie | 55 |

Laboratory Investigation

| | | |
|---|---|---|
| Phagocytosis, Bacterial Killing, and Metabolism by Purified Human Lung Phagocytes | John R. Hoidal, David Schmeling, and Phillip K. Peterson | 61 |
| Phagocytosis and Algicidal Activity of Human Polymorphonuclear Neutrophils Against *Prototheca wickerhamii* | John P. Phair, James E. Williams, Harry P. Bassaris, C. Raymond Zeiss, and Beverly A. Morlock | 72 |

Data Forum

| | | |
|---|---|---|
| Toxicity of Amantadine and Rimantadine for the Ciliated Epithelium of Ferret Tracheal Rings | D. Bruce Burlington, Gordon Meiklejohn, and Steven R. Mostow | 77 |

Selective Uptake of [$^{125}$I]Iododeoxycytidine in Cells Infected with Herpes Simplex Virus Type 1 — Oscar L. Laskin, Diane E. Griffin, and Paul S. Lietman — 78

Bone Marrow Cultures: Their Value in Diagnosing Fungal and Mycobacterial Infection in Patients with Cancer — Victor Fainstein, Roy L. Hopfer, Pamela Trier, and Gerald P. Bodey — 79

Susceptibility of Members of the *Mastomys natalensis* Species Complex to Experimental Infection with *Yersinia pestis* — Margaretha Isaäcson, Lorraine Arntzen, and Paul Taylor — 80

**Medical Perspective**

Surveillance Cultures — Stephen C. Schimpff — 81

**Editorial**

A Proposed Change in Bacterial Nomenclature: "A Rose by Any Other Name Is Not a Rose" — Philip Y. Paterson and Herbert M. Sommers — 85

**Institutional Reports**

Centers for Disease Control

Summary of a Symposium on Yellow Fever — John P. Woodall — 87

**Correspondence**

Serologic Differentiation of Legionnaires' Disease and Psittacosis — I. Kallings, C. Nyström-Rosander, A. Forsgren, and K. Ahlfors — 92

Reply — R. Ormsbee, M. Peacock, and G. Lattimer — 93

Funds for Research on Sexually Transmitted Diseases — Martha H. Tanner — 94

Reply — King K. Holmes and Milton Puziss — 95

**Statement of Editorial Policy** — 96

**Instructions to Authors** — 97

*Volume 144* • *August 1981* • *Number 2*

CONTENTS

**Original Articles**

Clinical Investigation

*Haemophilus influenzae* Infections in Adults: Characterization of Strains by Serotypes, Biotypes, and β-Lactamase Production — R. J. Wallace, Jr., D. M. Musher, E. J. Septimus, J. E. McGowan, Jr., F. J. Quinones, K. Wiss, P. H. Vance, and P. A. Trier — 101

Cryptic Epidemic of Q Fever in a Medical School — Gordon Meiklejohn, Larry G. Reimer, Patricia S. Graves, and Charles Helmick — 107

| | | |
|---|---|---|
| Anaerobic and Other Fastidious Microorganisms in Asymptomatic Bacteriuria in Pregnant Women | D. Regina M. McDowall, John D. Buchanan, Kenneth F. Fairley, and Gwendolyn L. Gilbert | 114 |
| *Ureaplasma urealyticum* in the Upper Urinary Tracts of Renal Allograft Recipients | D. F. Birch, A. J. F. D'Apice, and K. F. Fairley | 123 |
| Risk Factors for Infections of the Oropharynx and the Respiratory Tract in Patients with Acute Leukemia | E. Kurrle, S. Bhaduri, D. Krieger, W. Gaus, H. Heimpel, H. Pflieger, R. Arnold, and E. Vanek | 128 |
| Persistence of Humoral and Cell-Mediated Immunity to Rubella Virus in Cloistered Nuns and in Schoolteachers | Edmond Rossier, Peter H. Phipps, John M. Weber, and Olli H. Meurman | 137 |

Genetics in Infection

| | | |
|---|---|---|
| Measles, Histocompatibility Leukocyte Antigen Polymorphism, and Natural Selection in Humans | H. M. Coovadia, A. Wesley, M. G. Hammond, and P. Kiepiela | 142 |
| Immunopathology of Murine Infection with *Schistosoma mansoni*: Relationship of Genetic Background to Hepatosplenic Disease and Modulation | M. M. Fanning, P. A. Peters, R. S. Davis, J. W. Kazura, and A. A. F. Mahmoud | 148 |

Investigational Virology

| | | |
|---|---|---|
| Measles Virus Genome in Infections of the Central Nervous System | A. T. Haase, P. Swoveland, L. Stowring, P. Ventura, K. P. Johnson, E. Norrby, and C. J. Gibbs, Jr. | 154 |

Experimental Medicine

| | | |
|---|---|---|
| Experimental Subacute Sclerosing Panencephalitis: Selective Disappearance of Measles Virus Matrix Protein from the Central Nervous System | Kenneth P. Johnson, Erling Norrby, Peggy Swoveland, and Donald R. Carrigan | 161 |
| Diarrhea in Young Red Deer Associated with Infection with *Cryptosporidium* | Saul Tzipori, Kenneth W. Angus, Iris Campbell, and David Sherwood | 170 |

Data Forum

| | | |
|---|---|---|
| Association of Infection with *Chlamydia trachomatis* with Fitz-Hugh-Curtis Syndrome | J. Paavonen, P. Saikku, J. von Knorring, K. Aho, and S. P. Wang | 176 |
| Effect of Rifampin on Nasal Carriers of Coagulase-Positive Staphylococci | L. Joseph Wheat, Richard B. Kohler, Anne L. White, and Arthur White | 177 |
| Paradoxic and Tolerant Effects of Moxalactam on *Staphylococcus aureus* | Robert E. Nelson and John A. Washington II | 178 |
| The Risk of Transmission of Hepatitis B Virus Using Jet Injection in Inoculation | Jochen Abb, Friedrich Deinhardt, and Josef Eisenburg | 179 |
| Impairment of Antibacterial Effect of Bladder Surface Mucin by Protamine Sulfate | C. Lowell Parsons, Charles Stauffer, and Joseph D. Schmidt | 180 |

**Medical Perspective**

| | | |
|---|---|---|
| Anaerobes in Mixed Infections | Katherine McGowan and Sherwood L. Gorbach | 181 |

**Institutional Reports**

Centers for Disease Control

Pertussis in the United States, 1979: A Look at Vaccine Efficacy — Claire V. Broome and David W. Fraser — 187

Infections Due to Penicillinase-Producing *Neisseria gonorrhoeae* in the United States: 1976–1980 — Harold W. Jaffe, James W. Biddle, Steven R. Johnson, and Paul J. Wiesner — 191

CONTENTS

**Original Articles**

Immunology and Host Defense

Cleavage of C3 by Neutral Proteases from Granulocytes in Pleural Empyema — S. Suter, U. E. Nydegger, L. Roux, and F. A. Waldvogel — 499

A Polysaccharide-Protein Complex from *Haemophilus influenzae* Type b. I. Activity in Weanling Rabbits and Human T Lymphocytes — Porter Anderson and Richard A. Insel — 509

A Polysaccharide-Protein Complex from *Haemophilus influenzae* Type b. II. Human Antibodies to Its Somatic Components — Richard A. Insel, Porter Anderson, Marilyn R. Loeb, and David H. Smith — 521

A Polysaccharide-Protein Complex from *Haemophilus influenzae* Type b. III. Vaccine Trial in Human Adults — P. Anderson, R. A. Insel, D. H. Smith, T. R. Cate, R. B. Couch, and W. P. Giezen — 530

Pathogenesis and Cell Biology

Adhesion of *Entamoeba histolytica* Trophozoites to Monolayers of Human Cells — David Kobiler and David Mirelman — 539

Resistance of Neonatal Human Lymphoid Cells to Infection by Herpes Simplex Virus Overcome by Aging Cells in Culture — Elizabeth Grogan, George Miller, Thomas Moore, James Robinson, and John Wright — 547

Resistance of Virulent and Attenuated Strains of *Candida albicans* to Intracellular Killing by Human and Mouse Phagocytes — M. D. Richardson and H. Smith — 557

Medical Microbiology

Production of Germ Tubes by Virulent and Attenuated Strains of *Candida albicans* — M. D. Richardson and H. Smith — 565

Preliminary Serologic Evidence for a Pathogenic Role of *Branhamella catarrhalis* — Maija Leinonen, Jukka Luotonen, Elja Herva, Kaija Volkonen, and P. Helena Mäkelä — 570

Methicillin-Resistant *Staphylococcus aureus*: Microbiologic Characteristics, Antimicrobial Susceptibilities, and Assessment of Virulence of an Epidemic Strain — James E. Peacock, Jr., David R. Moorman, Richard P. Wenzel, and Gerald L. Mandell — 575

An Artificial Capillary in Vitro Kinetic Model of Antibiotic Bactericidal Activity — Stephen H. Zinner, Mireille Husson, and Jean Klastersky — 583

Experimental Medicine

Non-A, Non-B Hepatitis in Chimpanzees and Marmosets — S. M. Feinstone, H. J. Alter, H. P. Dienes, Y. Shimizu, H. Popper, D. Blackmore, D. Sly, W. T. London, and R. H. Purcell — 588

Type-Specific vs. Cross-Protective Vaccination for Gram-Negative Bacterial Pneumonia — James E. Pennington and Elias Menkes — 599

**Data Forum**

The Risk of Accidental Exposure to Hepatitis B Virus Via Blood Contamination in Medical Students — Karyln B. Bock, Myron J. Tong, and Sol Bernstein — 604

Depression of Natural Killer Cell Activity by Interferon — M. Ho, L. T. White, H. W. Haverkos, M. C. Breinig, G. J. Pazin, and J. A. Armstrong — 605
